

MADE IN U.S.A.

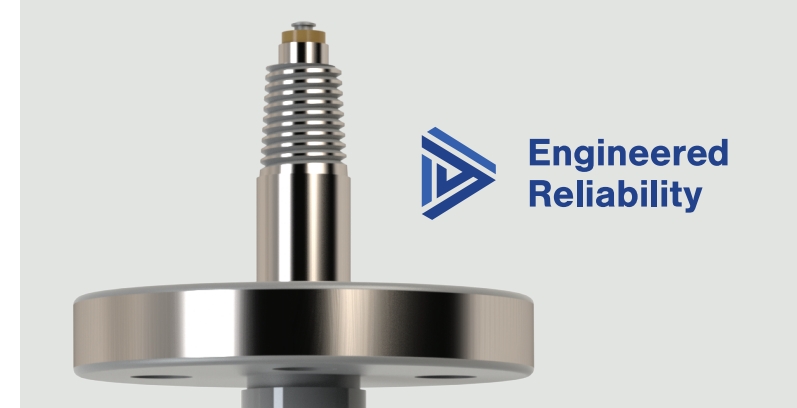

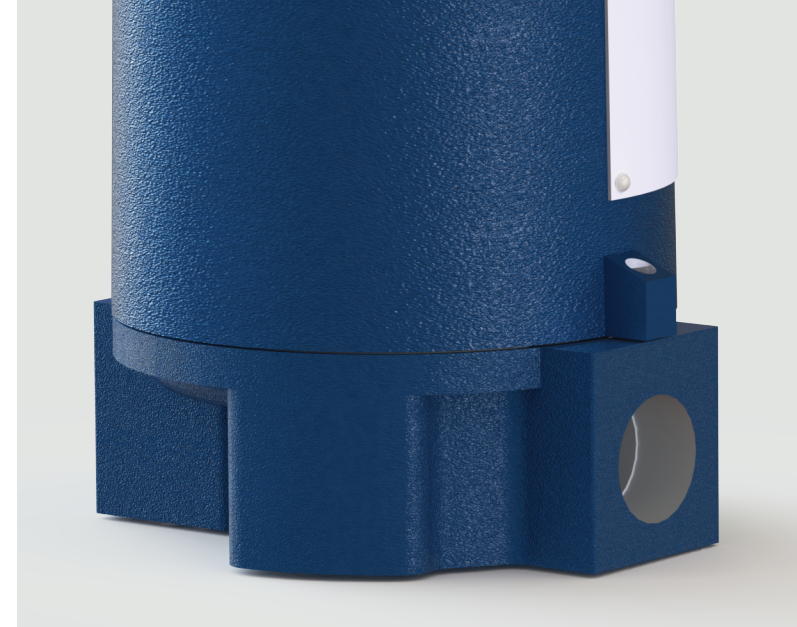

DELTACNT.COM

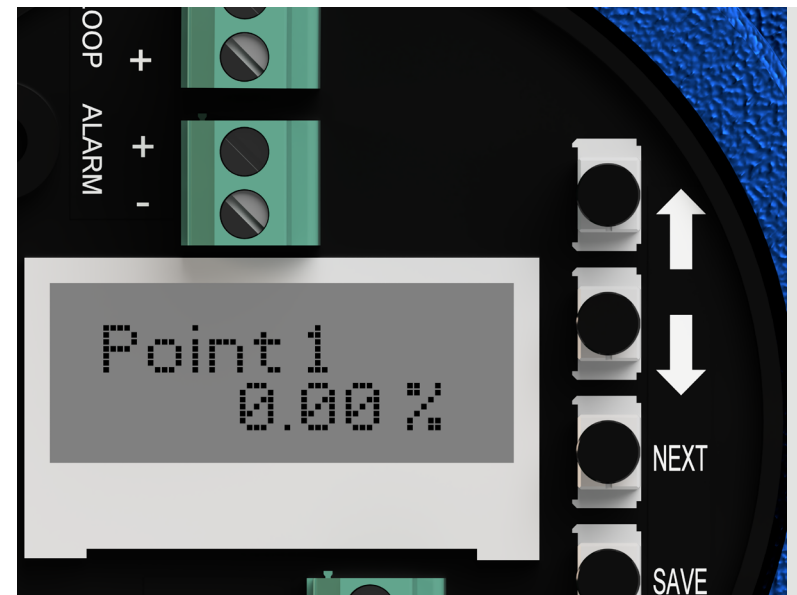

Celebrating 50 Years

All products made at the Shreveport, LA USA Factory

ISO9001:2015 Certified

**Engineered
Reliability**

Food Processing Instrumentation

OVERVIEW

Pressure

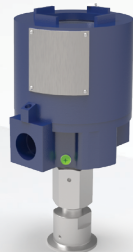

Model 551
Compact pressure transmitter for general use applications

Model 571
Compact pressure transmitter for sanitary applications

Model 552
Pressure transmitter for general use applications

Model 572
Pressure transmitter for sanitary applications

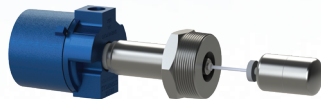

Mechanical

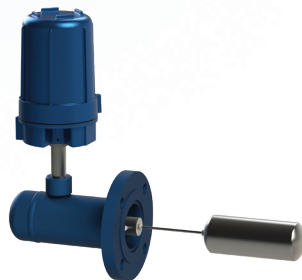

Model 760
Vertical float switch for general purpose applications

Model 765
Vertical float switch for multipoint applications

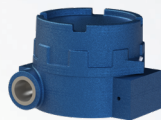

Model 735
Side inserted general purpose float switch

Model 740
Side inserted multi-point float switch

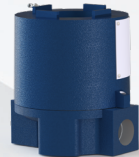

Capacitance

Model 105
Capacitance level switch for general purpose applications

Model 107
Capacitance level switch for multipoint applications

Model 173
Capacitance level transmitter for continuous level measurement

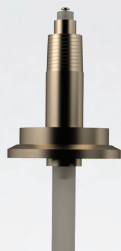

Model P51
Capacitance probe for general purpose applications

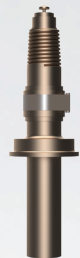

Model P21
Capacitance probe with ground shield for low dielectric service

Model P57
Capacitance probe with parallel ground reference for viscous applications

Model P61
Capacitance probe for sanitary applications

Model P62
Capacitance probe with tubular ground reference for sanitary applications

Model P71
Capacitance probe with flexible cable for long insertion lengths

Model P72
Capacitance probe with flexible cable for long insertion lengths and low dielectric service

Application Examples

Dairy Milk Tanks, Separators

Level sensing and detection, pressure measurement

>Capacitance, Pressure, Mechanical

Liquid Product Storage

Level sensing and detection, overflow prevention, pressure measurement, for agitated and unagitated vessels

>Capacitance, Pressure, Mechanical

Creatine Production Vessel

Level sensing and detection

>Capacitance, Pressure, Mechanical

Grain, Flour, and Sugar Silos

Level sensing and detection, overflow prevention

>Capacitance

Sugar Dissolver

Level sensing and detection

>Capacitance, Pressure, Mechanical

Custom Sensor Engineering

Engineered Solutions

Partner with Delta Controls to design or customize a sensor tailored for your unique processing needs. Delta Controls has customized sensors for filling machine hoppers with thousands of successful installations and actively pursues user needs for unique or unavailable control and sensing equipment. We commonly modify Delta products to efficiently and economically handle difficult services and unusual applications. Delta Controls has the in-house capability to test parameters including: operating ambient temperatures, life cycle under process conditions, precision distance, pressure, and temperature. We have the capability to prototype circuit boards, machine precision parts, and function test first run products.
